

PRINT SETUP

In your print dialog: Set **Scale to 100%** (or "Actual Size"). **Disable "Fit to page"** or "Scale to fit". Works on both Standard US Letter and A4 paper.

STEP 1: SCALE CALIBRATION CHECK (MUST MATCH BEFORE MEASURING)

METHOD A: CREDIT CARD CHECK
Place any standard credit card, debit card, or ID card inside this box. The card must align precisely with the outline.
85.60 mm × 53.98 mm (ISO/IEC 7810 ID-1)

← 50.0 mm (1.97 in) →

METHOD B: RULER CHECK
Measure width and height with a ruler.
Both sides must be exactly 50 mm.

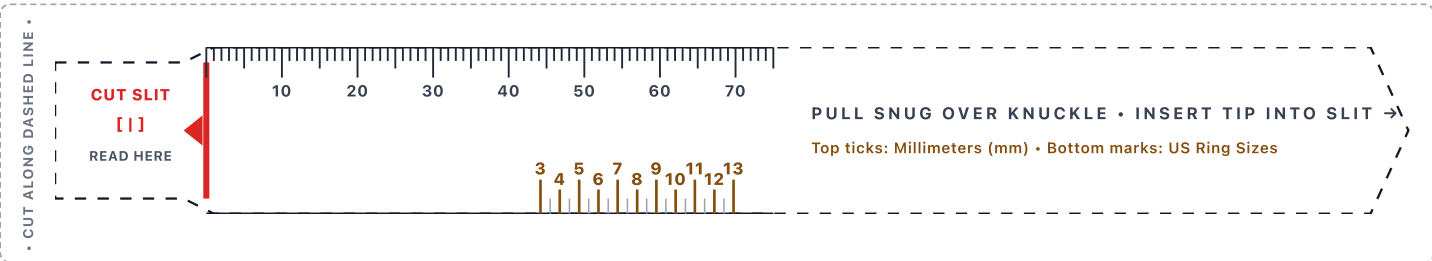

↑ 50.0 mm (1.97 in) ↓

Scale Verification Rules:

- If your card or ruler matches the outline, printout is **100% true scale**.
- If outline is smaller, your printer used "Fit to page". Switch to 100% Actual Size and reprint.
- No printer available? Use our digital calibration sizer at: ringsizeconvert.com/measure-ring-size/

TOOL A: CUT-OUT FINGER SIZER STRIP (MEASURE FINGER CIRCUMFERENCE)

Cut along outer dashed line. Cut a slit through line [SLIT |]. Wrap around the base of your finger and slide the pointed tip through the slit until snug. Read your **US size (bottom)** or **circumference mm (top)** right at the slit edge.

TOOL B: RING PLACEMENT CIRCLES (MEASURE AN EXISTING RING'S INSIDE DIAMETER)

Place a ring that fits flat over the circles below. Align the **inside diameter edge** of the ring with the black circle outline. The black circle should touch the inner edge of the band without black space showing. If between two sizes, order the larger size.
